Foreword

Population Census is indeed the only recognized and reliable source in Bangladesh for complete and quality database related to population size, spatial distribution and all basic characteristics of population from national level down to village. Bangladesh Bureau of Statistics (BBS) had conducted the fifth Population and Housing Census during the period from March 15-19, 2011 starting at the zero hour of 15 March, 2011. The publication of community reports for each Zila is undertaken on the basis of census results to meet the demand of community level data and information. Sylhet Zila Community Report is one of 64 Community Reports of the country.

The census results for each upazila by mahalla, mauza and village are furnished in the community report of Sylhet Zila in order to facilitate the users at various levels. Two sections of the report namely, “At a Glance” and an “Analytical Findings” will be of special advantage to the users. I believe that the classified data presented in the report will provide quality benchmark database to policy makers, planners, researchers, administrators, development partners and other agencies for formulating and implementing their plans and programs for overall development. I also believe that this report will be helpful for all users both at home and abroad.

The dedicated efforts of personnel employed in census have tremendously helped for the success of census. Moreover, the participation of people at large also plays a vital role in this operation. I deeply acknowledge the active participation and commendable cooperation of all the government and non-government organizations, district and field administration, different local government bodies, print and electronic media of the country for making the Census possible. I also express my gratitude to the European Union (EU), US Census Bureau, U.S. Agency for International Development (USAID) and United Nations Population Fund (UNFPA) for their financial and technical support for completing this huge task. I express my heartfelt gratitude to Air Vice Marshal (Retd.) A. K. Khandker, Honourable Minister, Ministry of Planning for his effective guidance and significant cooperation throughout the Census operation. We are also grateful to the respected Cabinet Secretary and the Senior Secretary, Ministry of Public Administration for their active cooperation.

The Population and Housing Census had made best use of the modern IT technology. In order to minimize time and manpower, modern technology like ICR (Intelligent Character Recognition) machines and iCADE (Integrated Computer Assisted Data Entry) system were used in capturing the census data. CSPro software was used in analyzing and processing of data. In earlier censuses, it took a long time to publish the final report following the enumeration. We had a plan to reduce the gap by publishing all reports including Community and Zila Reports for Population and Housing Census 2011, within the shortest possible time. The census preliminary report has been published within 4 months of data collection and census data for the whole country up to mauza/village level has been disseminated through BBS website within 15 months after the enumeration. I express my thanks to Director General and Deputy Director General, BBS, Project Director, Population and Housing Census 2011, members of the Editors’ Forum and all other officers and staffs involved in the efforts and finally bringing out this report in time.

Preface

Bangladesh has a long tradition of conducting the population census on decennial basis since 1872. The fifth population census of Bangladesh and fifteenth in the region, following the decennial periodicity, was conducted during March 15-19, 2011. The main objective of the census was to collect information on the basic characteristics related to housing, households and population for developing a comprehensive database for all development planning and human resource development programmes as well as economic management.

Population and Housing Census 2011 was conducted in three phases. In the First Phase, basic data about all households and individual members of the households were collected through ICR formatted questionnaire during March 15-19, 2011. In the Second Phase, quality and coverage of the main count were verified through a Post Enumeration Check (PEC) survey during April 10-14, 2011. For the first time in the census history of Bangladesh, PEC was conducted by an independent organization, namely Bangladesh Institute of Development Studies (BIDS). In the Third Phase, detailed socio-economic information was collected by administering a long machine readable questionnaire in a sample survey held during October 15-25, 2011.

The preparatory works of the census was started by Bangladesh Bureau of Statistics from mid 2009 with updating maps and area Geo-codes. The preliminary checking on the census questionnaire was done in several times through field operation. The census questionnaire was pre-tested in selected areas with the participation of some experts of the "Technical Committee". The views of the users' and experts' were taken into consideration for finalizing the questionnaire. The census field operation and quality of census inputs were tested under two zonal operations. Accordingly the questionnaire was designed in machine readable format with the technical assistance of US Census Bureau and was printed with the financial assistance of European Union (EU) through the United Nations Population Fund (UNFPA).

The entire country was divided into 2,96,718 Enumeration Areas (EAs) with the help of enumeration area maps in order to ensure full coverage, effective management and close supervision. There was a supervisor for every 6 or 7 enumerators to supervise their works. The Geo-coding system developed in the previous Census was checked, edited and computerized.

Modified Defacto Method was adopted in enumerating the population. Zero hour at the night of 15 March, 2011 was considered as the census moment. On the other hand, the hours between census moment and the following morning (6.00 a.m.) was considered as the census night. Basically the floating people were counted at that night for avoiding omission and duplication.

Census committees were formed at Zila, Upazila, Paurasava, Union/Ward levels to ensure participation of local administration and local bodies. Moreover, supervisors and enumerators were appointed from amongst the local unemployed youths and teachers.

At national level, a standing technical committee comprising of well-known census experts and users of census data was formed to provide technical support to BBS in planning, designing and executing the census. A seminar-cum-expert consultation was held at BBS with the census data users, experts, researches and educationist to get their views for finalizing the census questionnaire and other policy related issues.

A nationwide publicity campaign was carried out before census through posters, banners, leaflets, brochures, features, films, miking, radio, television and newspapers for the purpose of creating public awareness and motivation.

I express my heartfelt gratitude to the Honorable Minister for Planning for his effective guidance and significant cooperation in making the census a success. I express my deepest gratitude to Secretary, Statistics and Informatics Division (SID) for his whole-hearted support and cooperation to the census. Moreover, members of 'Steering Committee', 'Standing Technical Committee', Consultants and also to participants of the Seminar-cum-Expert Consultation for their valuable contributions for finalizing the questionnaire and the census programme. I am thankful to all members of the sub-committees on publicity, sampling and report writing for their valuable contribution. I am also thankful to our mass media, local bodies and the people at all level for their whole-hearted supports to the census.

Finally, I like to thank Deputy Director General, BBS, Project Director, Population and Housing Census 2011 Project, members of the 'Editors' Forum', 'Project Directors' Forum' and other officers and staff members of BBS who vigorously helped in implementing the census activities and processing the census data with their relentless efforts to make the census a success and bringing out this report within a very shortest possible time.

Physical Features of Sylhet zila

Background, Area and Location: The area now constitutes Sylhet zila was once a part of the Kingdom of Jaintia. It is situated on the bank of the river Surma. There are different opinions about the origin of the zila name. The general belief is that in the remote past a trading centre (locally known as hatta) of grinding stones (meaning Syl) was developed at the foot of hilly areas where the zila headquarters is located. In consequence, the zila came to be known as Srihatta. Subsequently, it was renamed as Sylhet. The zila is bounded on the north by India, on the east by India, on the south by Maulvibazar zila, and on the west by Sunamganj zila and Habiganj zila. The total area of the zila is 3452.07 sq. km. (1332.00 sq. miles). The zila lies between 24º36' and $25^0$11' north latitudes and between 91º38' and $92^0$30' east longitudes.

Temperature, Rainfall and Soil: The maximum temperature of the zila is 33.2°C and the minimum is 13.6°C. The annual average rainfall of the zila is 3334 mm.

Main Rivers: The Surma and the Kushiara are the main rivers of the zila. The zila is particularly famous for its topographical feature. It is a land of many Haors, Beels and huge forests areas. Many big Tilas and parts of Khasia and Jamla hills are also found in the zila.

The rapid growth and expansion of Sylhet occurred during the colonial period. Sylhet Municipality was established in 1878. A devastated earthquake demolished almost the entire town on 12 June, 1897. On the wreckage a modern and European model new town was built later on. Many new roads were constructed in late 1890s. Sylhet became really connected to the other parts of the country with the establishment of an extension line of Asam-Bengal Railway in 1912-15. From the very beginning of the 20th century, importance of Sylhet town increased with the establishment of tea industry. In 1950s and 1960s, rapid urbanisation took place in the town by the expatriate Syleties and still the process is going on. At present, Sylhet is the zila-headquarter as well as the divisional headquarter.

Administration: Sylhet zila was established on 3 January, 1782. Until 1878, Sylhet was under the jurisdiction of Dhaka division. In the same year, Sylhet was included in the newly created Asam Province. Up to 1947 (excepting the Banga Bhanga period of 1905-1911) it remained a part of Asam. In 1947, as a result of a referendum, it was attached to the East Pakistan and was included in the Chittagong Division. The greater Sylhet was divided into four new zilas viz Sylhet, Sunamganj, Habiganj and Maulvi Bazar in 1983-84. On 1 August, 1995 Sylhet was declared as the 6th division of the country consisting of the four zilas of the greater Sylhet. The zila consists of 1 City Corporation, 12 upazilas, 101 unions, 1696 mauzas, 3206 villages, 27 City Wards, 242 City mahallas, 4 paurashavas, 36 wards and 111 mahallas. The upazilas are Balaganj, Beanibazar, Bishwanath, Companiganj, Fenchuganj, Golap

Archaeological Heritage and Relics: Stone monument of Jaintapur, Mound of Gharduara, Gaiyabi Mosque, tombs of Hazrat Shah Jalal (R.) and Shah Paran (R.), Abu Torab Mosque, Nawabi Masque, Mughal Mosque at Akhalia, Dhaka Dakshmin Temple, Tin Mandir (trio temple) are the remarkable archeological relics of Sylhet zila.

Historical Events: Sylhet is an ancient settlement area. It was known as Jalalabad in Sultani period. From the Pashchimbagh brass plate engraved by the Maharaja Shreechandra in 10th century, it could be assumed that he conquered Sylhet. Many historians think that Sylhet or Sreehatta (enriched market place) was an expanded commercial centre from the ancient period. A large number of Bengalis migrated to Sylhet. In the 14th century, Muslim saint from Yemen Hazrat Shah Jalal (R) triumphed Sylhet and began to preach Islam. The Pathan valiant Khawja Osman fought against the Mughal with the help of local lords. During the Sepoy Mutiny in 1857 the British traders defeated the mutineers. The Nankar revolt is another important event in the history of Sylhet. The Nankars were the serf of the zamindars. As a result of Nankar and other similar revolts the Nankar system was abolished in 1950.

Famous Personalities of the District: Sylhet is the homeland of many national and international reputed heroic sons of the soil. Some of the renowned personalities are mentioned below:

Humayun Rashid Chowdhury: Humayun Rashid Chowdhury was one of the most brilliant civil servant, successful foreign secretary, diplomat and High commissioner. He became the Speaker of Bangladesh Nation Assembly.

Shah Paran (Shah Farhan): Shah Paran (Shah Farhan) was renowned Sufi (saint) and the nephew of Hazrat Shah Jalal(R). He came to Sylhet from Yemen and established a 'Khankah' at Kadim Nagar, 7 k.m. away from Sylhet town where he used to do spiritual practices and activities.

Shah Jalal: Shah Jalal was the most respected Muslim Sufi (saint) in this part of Bengal. He played a significant role in order to preach Islam in this region. His Mazar Sharif (Graveyard) is located in Sylhet town which is visited by hundreds of his devotees from different parts of the country and abroad.

Syed Mujtoba Ali: Syed Mujtoba Ali was a renowned educationist and a great scholar. He had a unquenched of thist for knowledge as a result of which he studied foreign universities of many countries and lastly earned his Ph.D degree from the University of Bonn.

Marks of the War of Liberation: There are 13 Mass graves, 9 mass killing sites, 14 memorials and one memorial statue in Sylhet zila.

Main Crops: Paddy, mustard, betel nutare the main crops of Sylhet zila.

Main Fruits: Mango, jackfruit, orange, lichi, Pineapple are the main fruits of Sylhet zila.

Mineral Resources: Natural Gas, crude oil are the main mineral resources of Sylhet zila.

CHAPTER – 1
Introductory Notes on Census

1.1 Introduction: The population and housing census is the unique source of reliable and comprehensive data about the size of population and also on major socio-economic & socio-demographic characteristics of the country.

The population and housing census provides information on geographic and administrative distribution of population and household in addition to the demographic and socio-economic characteristics of all the people in the country. The data from the census are classified, tabulated and disseminated so that researchers, administrators, policy makers and development partners can use census data in formulating and implementing various multi-sectorial development programs at the national and community levels

The purpose of community report is to disseminate census data by communities (ward/mahalla in urban areas and union/mauza/village in rural areas). Data on all key variables namely area, household, population by sex and age group, ethnic population, literacy rate, marital status, school attendance , employment status and religion as well as physical facilities such as source of drinking water, sanitation, electricity and dwelling units have been presented in this report. The users will find this report as a valuable reference document for formulating plans and programmes for welfare and well-being of the common people, in particular for the community in general.

1.2 Census and its Periodicity: Bangladesh Bureau of Statistics is the National Statistical Organization for conducting national census. In 1872, the practice of census was started in Bangladesh territory. Thereafter, another census was conducted in 1881 and since then the decennial periodicity of census was maintained with the exception of 1971 which was held up and delayed till the year 1974 because of the Liberation War. The 1974 census was the first census in Bangladesh after her emergence as an independent state in 1971.Bangladesh went back to the decennial periodicity and conducted the second, third, and fourth censuses in 1981, 1991 and 2001 respectively. The Population and housing census of 2011 is the 5th in this census series.

1.3 Objectives: The population census was carried out to achieve the following objectives:

- ►to count the population and the number of households of the country;
- ►to obtain data on demographic characteristics by gender and residence;
- ►to obtain data on disability;
- ►to collect information on housing, household structure and other selected facilities;
- ►to generate data on gender specific occupation and participation in economic activities;
- ►to gather basic information on ethnic people and
- ►to prepare socio-economic database for policy makers, planners and researchers etc.

1.4 Census Phases: The census data collection was completed in three phases.

Phase I - Main Count: Collection of basic information for all households and individuals using an ICR formatted questionnaire.

Phase II- Post Enumeration Check (PEC): A PEC survey was carried out to measure quality and coverage of the main census count. The survey was conducted immediately after receiving filled-in census questionnaires at Dhaka head office. For the first time in census history of Bangladesh, the PEC was conducted by an independent organization, namely Bangladesh Institute of Development Studies (BIDS).

Phase III- Sample Census: A sample census (large scale sample survey) was carried out at the last phase. For this undertaking, ICR formatted long questionnaire was adopted to supplement the data of the main census. Being a programme of much wider information coverage, the sample census was carried out with the detailed data relating to population and household characteristics including fertility, mortality, morbidity, migration etc.

1.5 Census Planning: The census preparatory work programme was mounted in the mid of 2009. A census work-plan was prepared defining in details the activities to be performed and completed by specific dates in each calendar year. Field instruction manual and training manual were prepared for census workers of different stages. These manuals provided precise guidelines regarding: (i) duties and responsibilities to be performed at all levels, (ii) lessons to be given when imparting trainings to field supervisors and enumerators, (iii) mapping and geo-coding operation to be done, (iv) how questionnaire to be filled-up, (v) enumeration and supervision disciplines to be adhered, (vi) census workers to be put in place, (vii) census materials be distributed, (viii) Committees at different levels to be formed, and (ix) publicity plan to be implemented.

1.6 Mapping: The updated and well defined map is one of the basic instruments to succeed any population and housing census. The primary objectives of the mapping operation are (i) to update the produced GIS maps and delineate enumeration areas (EA) in the country to facilitate the smooth counting of inhabitants during enumeration and (ii) fundamentally to ascertain that all areas are covered and that everyone in the country is counted with minimal possibility of under or over counting.

Household counting for EA demarcation and concurrent EA mapping activities were carried out in two phases beginning from May, 2009. The first phase, confined exclusively to rural areas, necessitated updating and preparing of union, mauza, and control maps. The second phase was initiated only for urban coverage in view of the complex task associated with household and EA boundary identifications due to quite dense habitations in urban localities. All urban ward, mahalla, and control maps were updated and/or newly prepared showing current boundaries. BBS used GIS Maps for field operation for the first time in census history of Bangladesh. GIS Maps Project of BBS produced the maps from aerial photography. The updated maps were used for zonal operations. All maps were finally checked and updated during zonal operations. The updated EA maps were used for main census, PEC and sample censuses.

1.7 Designing and Pre-testing of Questionnaire: The contents of census questionnaire were determined based on data needs assessed on government current priorities and also recommendations of technical committee and data users. Several preliminary checks of the questionnaire were made locally. Lastly, the questionnaire was pre-tested in selected areas with participation of some experts of the technical committee. Satisfactory pre-test results were resolved in finalising a two module questionnaire for adoption in the census. Accordingly the questionnaire was designed in machine readable format with the technical assistance from US Census Bureau and was printed with the financial assistance from European Union (EU) through United Nations Population Fund (UNFPA).

1.8 Questionnaire: A two module questionnaires was used for the main census. As many as 25 questions were included in it. A total of 11 questions relating to housing and household characteristics were included in household module. The remaining 14 questions focusing on individuals were incorporated in individual module. The items of the questionnaire were identification, address of household, number and structure of house including tenancy, toilet facility, electricity connection, ethnicity, individual age, sex, religion, marital status, literacy, disability, education and working status. All data on the items were collected through door to door visit and interviewing head of the household or responsible member in absence of head of the household.

1.9 Zonal Operation: Two zonal operations were executed in both urban and rural areas. These operations helped in setting up a system germane to: (i) involve local people in the census, (ii) interact with local bodies, and (iii) ensure efficient field work arrangements.

The first zonal operation was held during May-July 2010 in 3 (three) phases. In first phase it covered 39 Zilas, second phase 17 Zilas and third phase 8 Zilas. During first zonal operation the following tasks were completed:

a) Updated of geo-code list;
b) Updated of Mauza and Mahalla maps with demarcation of EA boundaries;
c) Prepared the supervisors' sketch maps;
d) Prepared the primary list of local enumerators and supervisors with names and addresses and
e) Identified the depopulated Mauzas and Mahallas.

Besides, Zonal Officers introduced themselves to the public representatives of different local bodies and local administration and sought their support and cooperation in completing census activities successfully. They extended all sorts of cooperation and gave their best effort for the completion of field activities of census in Sylhet.

The second zonal operation was mounted just three months prior to census, i.e. November-December 2010, to conduct the main census in March, 2011. This schedule ensured the smooth flow of census activities including field management system.

The main tasks completed in second zonal operation:

a) Formed census committees in zilas, upazilas/thanas, wards/unions, paurashavas and city corporations,
b) Interacted with local bodies,
c) Verified supervisor maps and getting those finalised,
d) Finalized the lists of supervisors and enumerators and
e) Checked and endorsing locations and available facilities of training centres selected to train enumerators and supervisors. All these activities were performed by 2,612 Zonal Officers under the supervision of 130 Zila Census Coordinators who were engaged from BBS and other ministries.

The terrains and habitation patterns of the localities were taken into consideration in forming EAs. Mauza/Ward maps were used for exact identifications of EAs within mauzas and wards. During census enumeration final base maps and supervisor maps were used by the Zonal Officers, Enumerators and Supervisors for field control and overcoming coverage errors.

1.10 Organization: The lowest unit of census was Enumeration Area (EA). As many as 2,96,718 EAs were delineated all over the country where Sylhet had the total number of 6367 EAs. Above them there were 48,531 Supervisors' Areas (SAs) throughout the country where Sylhet had 927 Supervisors' Areas with every SA having 6-7 EAs. For each EA one enumerator and for each SA one supervisor were appointed temporarily from amongst local educated youths. Females were given priority in selecting enumerators and supervisors. Enumerators and supervisors were controlled by 2,612 Zonal Officers where at Sylhet there were 55 Zones. To supervise the activities of zonal officers, 130 Census Zila Coordinators deployed from Class-I officers of BBS, SID and Ministry of Public Administration. For census operation Sylhet zila was divided into 3 Census zilas, each census zila was supervised by one Census Zila Coordinator. Each zone was consisted of taking about 100 enumeration areas. The large mauzas/villages were divided into two or more enumeration areas and small mauzas/villages were merged to form an enumeration area consisting of about 120 households, keeping in view the terrain and habitation pattern of the locality. The Project Director of Population and Housing Census Project was the coordinator of field activities and maintained liaison with higher authority and different organizations. The Director General of Bangladesh Bureau of Statistics acted as the Census Commissioner and the National Census Coordinator. The Secretary of Statistics and Informatics Division was the Chief Census Coordinator who guided the whole system of census programme and implementation.

The local administration and public representatives participated in the census through census committees formed for City Corporations, Paurashavas, Zilas, Upazilas, Wards, and Union Parishads. The Mayors of City Corporations and Paurashavas, Deputy Commissioners, Upazila Chairman, Ward

Councillor and Chairman of Union Parishads headed the respective census committees with BBS officials being the Member-Secretaries.

Central census control room was established at Dhaka headquarters of BBS (Parishankhyan Bhaban) under active supervision of the Project Director. Similarly, control rooms were established in each administrative levels namely Zila, Upazila and Union. These control rooms functioned round the clock during entire field enumeration period. A number of officials were engaged to provide logistics during census field activities, monitored constantly the census performance, informed the National Coordinator and Chief Census Co-ordinator about performance status and obtained their instructions for successful completion of the census.

1.11 Enumeration: The population across the country was counted at a stretch in five days during 15-19 March 2011 using machine readable questionnaires. The counting began at zero hour of 15 March 2011. Floating people were counted from zero-hour till 6.00 am (the night is called census night) at the places where they were found passing the night. In case of households, on the other hand, all members were enumerated in their residences. The modified de-facto method was followed in counting, i.e. every person was counted at the place where he/she stayed in the census night except the people on board and on duty, counted at their residence.

1.12 Data Capturing/Processing: The adoption of Intelligence Character Recognition (ICR) strategy was planned for census data capturing. As such, ICR machines were procured. BBS had gathered experience in OMR and OCR techniques of data capturing from earlier censuses of 1981, 1991 and 2001. The ICR technology was introduced at this census in BBS. US Census Bureau supported BBS in using Capture Pro and iCADE (Integrated Computer Assisted Data Entry) system for data capturing. For analyzing and tabulating census data CSPro software was used.

iCADE: Integrated Computer Assisted Data Entry provides digital images of respondent questionnaires. Data are processed through OMR, OCR, KFI, quality assurance, and automated detailed tracking of each step in the process.

Steps:

i) **Batching and Batch Identification:** Filled-in census questionnaires are batched for processing. An identifying batch cover sheet is created. Batch status numbers are kept in the database along with other relevant metadata.

ii) **Scanning:** Each page from the batched census questionnaires is scanned into a TIFF Image. In each step status info is kept in the database.

iii) **Auto-registration:** Auto-registration relates images to the Master Template, registers Form barcodes, and reads checkboxes. There may be preliminary “mini” OCR processing here. Auto-registration then creates a script with data captured so far.

iv) **Manual Registration:** Images where auto registration detected positional tolerance errors are sent to a clerk, who resolves skewing and bar code issues and repairs checkbox ambiguities. The OMR clerk examines all checkboxes.

v) **Batch Completeness/Exception Review:** Batch completeness identifies batches with problems, forms with missing, loose, or duplicate pages, batched not scanned, scanned not batched. In Exception Review, the clerk researches each issue (checking paper forms if needed) and takes appropriate action.

vi) **OCR Review:** Converts designated handwritten and printed text fields to electronic data, with greater than 99% accuracy for numbers. A clerk then reviews OCR results, verifying all 1s, 2s, etc. Any rejected field must be reprocessed using KFI.

vii) **Key From Image (KFI):** The OMR portion of the programme will capture check box data prior to KFI. KFI technology guides a keying clerk to the write-in fields on the form where the system detects presence. Furthermore, a keyer will not be taken to any fields already read by the OCR machine. Keyers may also re-register skewed pages or correct checkbox answers.

viii) **Quality Assurance (QA):** Two samples are drawn, one from the OCR read "universe" and one from the KFI keyed-in "universe". They are sent to an independent keyer to be rekeyed. OCR and KFI may have different sampling rates and different accept/reject quality rates. These results are then verified against the earlier captured data, and discrepancies are presented and corrected by analysts.

ix) **Sample Verification, Classification and Adjudication:** A sample of the fields is keyed in by an independent verifier. A classifier reviews images and data from OCR/KFI and compares with verifier's data. An adjudicator determines final truth and decides if the batch is acceptable, and determines the cause of discrepancies, which may be charged against the original keyer.

x) **Remainder Verifier, Classifier and Adjudicator:** If batch quality for either universe is unacceptable, all remaining fields are rekeyed by a verifier, and results are compared and corrected by a classifier, and adjudicated by a final adjudicator.

All records were subject to an efficient computer edit and imputation programme. The errors and inconsistencies, if detected, were imputed by applying both 'hot-deck' and 'cold-deck' methods.

1.13 Data Tabulation: For all Zilas, separate files were maintained. The census tabulation plan was finalised through technical committees' recommendations admitted of options for comparing most of the individual cells with 2001 census results. The tabulation programme was developed in CSPro and thoroughly tested before adopting for census tabulation. All tables were transferred to MS Excel/MS Word format for ensuring correct headings and footnotes.

1.14 Publication: The census reports will provide population information at the national, Zila and community levels. Besides the Community Reports, Zila Reports, National: Analytical Reports, Socio-economic & Demographic Report, Union Statistics Report and Administrative Report will be published during the coming months.

1.15 Post Enumeration Check (PEC): To assess coverage of the census an effectively designed Post Enumeration Check (PEC) survey was conducted just a month after completing the census. Bangladesh Institute of Development Studies (BIDS) conducted the PEC survey. The PEC survey data were collected during 10-14 April 2011. The net under coverage rates were estimated separately for national level aggregate and also for rural, urban, other urban (Upazila Headquarters) and City Corporation areas which are given below:

Locality	Net error rate (%)
National	3.97
Rural	3.80
Urban	5.26
Other Urban (UHQ)	4.07
City Corporation	3.86

The PEC Survey Report can be obtained from Bangladesh Institute of Development Studies (BIDS) and also from the online addresses of Bangladesh Bureau of Statistics and BIDS respectively: *www.bbs.gov.bd* and *www.bids.org.bd*

CHAPTER -2
Concepts and Definitions

The concepts and definitions adopted in the census and those presented in this report are as follows:

2.1 Census Moment: It is the precise time hour fixed for starting nation-wide census enumeration. In the census, the zero hour of 15 March 2011 was treated as the census moment.

2.2 Census Night: The time span from census moment of time zero hour to 6:00 a.m. of 15 March 2011 was the census night.

2.3 Census Period: It includes the days ascertained to complete the census enumeration activities. In this census, 15-19 March 2011 was considered as the census period.

2.4 Reference period: It is reference time cut off to which particular sets of census date items relate. In this census two reference periods were used. These are:

i) Field of Economic Activity: One week preceding to census moment (8 to 14 March 2011)

ii) For other variables: Census night.

2.5 Modified De-facto Method: It means the system of enumerating people at places of their residence or where they spent the census night. Adhering to this method, the counting of floating population across the country was completed during census night at places they were found except the people on duty or on board. The remaining vast majority of the people were counted in their usual residence (including people on duty or on board) during 5 (five) days census period. As this is a slight deviation of de-facto method, so it is termed as modified de-facto.

2.6 Floating Population: People who were detected passing the census night at railway stations, launch ghats, bus terminals, boats, temples, pagodas, mosques, hotels (boarders), footpaths, under building-stairs, overpass/underpass and some other unusual places were considered as floating population. The people who were fishing at deep sea and hiving in the forest especially in the Sundarbans were also treated as floating population.

2.7 Household: Persons, either related or unrelated, living together and taking food from the same cooking pot constitute a household. A single person living and eating alone forms one-person household. Households which are classified into three categories are defined below:

i) **General (dwelling) Household:** Includes all households having usual dwelling places. In 2001 census it was used as dwelling household.

ii) **Institutional Household:** Hospitals, clinics, jails, barracks, orphanages, hostels/halls of educational institutions etc. were treated as Institutional Households.

iii) **Other Household:** Includes those households other than general and institutional found in census night such as messes, shops, offices etc.

2.8 Ownership and Tenancy of Dwelling Unit: Tenancy status of dwelling units were classified into the following three classes:

i) **Owned:** Dwelling unit found occupied and used by household owning it.

ii) **Rented:** Dwelling unit found occupied and used under arrangement of contractually rented.

iii) **Rent free:** Dwelling unit found occupied and used without rent.

2.9 Literacy: It denotes to the ability of writing a letter in any language. Literacy rate is calculated for population 7 years and over, 15 years and over and also for population of all ages.

2.10 Sex Ratio: It is the number of males per 100 females.

2.11 Community: It refers to the following geographic, administrative or revenue units:

i) **Zila:** Zila (Bengali word of District) is a mid-level administrative unit comprising of several upazilas/thanas and having Zila Parishad institution.

ii) **Upazila:** Upazila (Bengali word of Sub-district) is a rural administrative unit comprising of several unions and having Upazila Parishad institution.

iii) **Union:** Smallest administrative rural geographic unit comprising of mauzas and villages and having Union Parishad institution.

iv) **Mauza:** Lowest administrative unit having a separate jurisdiction list number (J.L No) in revenue records. Every mauza has its well-demarcated cadastral map. Mauza should be distinguished from local village since a mauza may consist of one or more villages.

v) **Village:** Lowest rural geographic unit either equivalent to a mauza or part of a mauza.

vi) **Ward:** Smallest administrative urban geographic unit comprising of mahallas and having ward council institution.

vii) **Mahalla:** Lowest urban geographic unit.

2.12 Urban Area: It corresponds with area developed around a central place having 5000 population with such amenities as metaled roads, improved communication, electricity, gas, water supply, sewerage, sanitation and also having comparatively higher density of population with majority population in non-agriculture occupations. City, Town, Paurashava and Cantonment are the examples of urban area.

i) **City Corporation:** It includes city corporations incorporated and administered by the local government under City Corporation Act, 2009.

ii) **City:** It is an urban area having population 1,00,000-49,99,999 .

iii) **Town:** It is an urban area having population less than 1,00,000 .

iv) **Paurashava (PSA):** It includes paurashavas incorporated and administered by local government under Paurashava Act, 2009.

v) **Other Urban Area (OUA):** It includes those Upazila headquarters which are not paurashavas. The only exception is the 17 unions adjacent to Dhaka City Corporation under Dhaka Metropolitan Area. These unions are treated as other urban areas on the basis of their urban characteristics.

2.13 Growth Rate: The annual population growth rate has been computed using the annual compounding formula:

$$P_n=P_0(1+r)^t$$

Where,

P_n = The population of 2011 census
P_0 = The population of 2001 census

r = Annual population growth rate

t = Time period between 2011 census to 2001 census

3.1.1 Background: Balaganj, the second biggest upazila of Sylhet zila in respect of population came into existence on 10 January, 1922 as a thana and was upgraded as upazila in 1984. It is learnt that in the past the Zamindar of Barachar built a temple of God Madan Mahan here. A trading centre means ***ganj*** was developed in and around the temple, which specially became popular to Hindu ladies for high quality of Bangles locally known as ***Bala***. The upazila might have got its name **Balaganj** from the combination of these two wards ***Bala*** and ***ganj***.

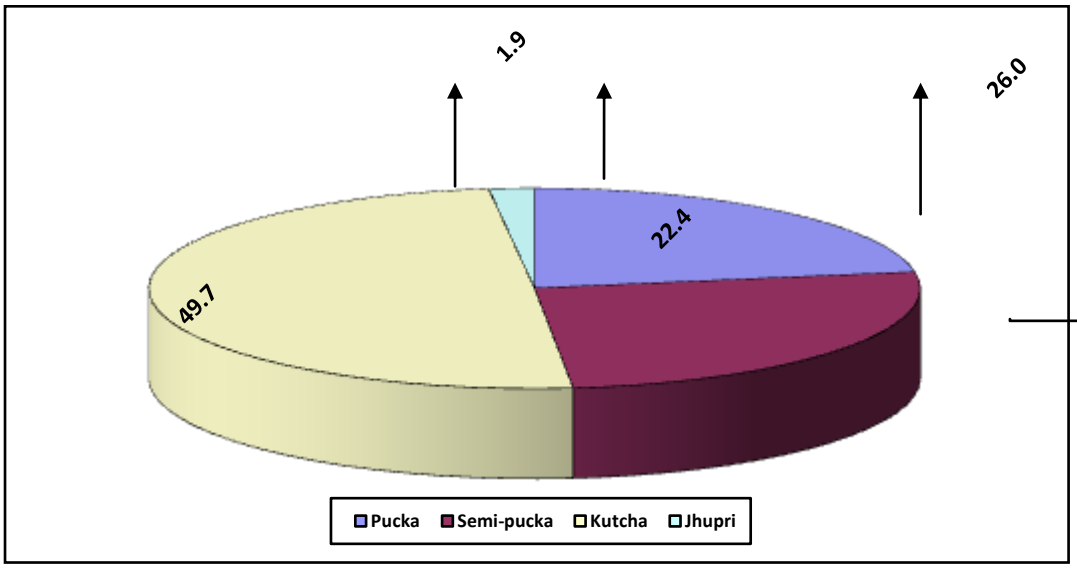
3.1.2 Area and Location: The upazila occupies an area of 375.75 sq. km. It is located between 24º36´ and 24º47´ north latitudes and between 91º38´ and 91º56´ east longitudes. The upazila is bounded on the north by Sylhet Sadar and Bishwanath upazilas, on the east by Fenchuganj upazila, on the South by Maulvibazar Sadar upazila and Rajnagar upazila of Maulvibazar zila and on the west by Jagannathpur upazila of Sunamganj zila and Nabiganj upazila of Habiganj zila.

3.1.3 Union-Ward, Mauza-Mahalla and Village Characteristics: The upazila consists of 14 unions, 240 populated mauzas and 473 villages. The average size of each union, mauza and village are 22873, 1334, and 677 respectively.

3.1.4 Housing and Household Characteristics: In the upazila, there are 54246 households. Distribution of households by type shows that, there are 99.65% general units, 0.08% institutional and 0.26% other units.

- **Household Size:** The average household size (General) for the upazila is 5.9 persons, for rural area the size is also 5.9 and for urban area the size is slightly lower i.e., 5.6.
- **Type of Housing Structure:** In the upazila 22.4% general households live in pucca houses, 26.0% in semi-pucca houses and 49.7% in kancha houses and the remaining 1.9% live in jhupri which is shown in a pie-chart below:

Figure 1.1: Housing structure by type, 2011



- **Source of Drinking Water:** In Balaganj upazila 68.6% of general households have got the facility of drinking water from tube-well water, 2.1% tap water and the remaining 29.3% households get water from other sources.
- **Sanitation:** In the upazila, 60.7% of general households have sanitary latrines, 35.6% non-sanitary latrines and 3.8% have no toilet facility.
- **Access to Electricity:** All the 14 unions of the upazila have brought under the Rural Electrification Program. However, a total of 57.9% of the general households reported to have electricity connection in the entire upazila.

3.1.5 Population Characteristics: According to Population and Housing Census 2011, the total population of the upazila is 320227, of which 157975 are males and 162252 are females. The sex ratio of the upazila is 97 males per 100 females in 2011 as against 104 males per 100 females in 2001.

- **Growth Rate:** The decadal population growth rate for the upazila is 24.97 and annual compound growth rate is 2.22. The decadal growth rates over the last half-century are shown below:

Table 1.1: Decadal growth rate of population, 1951-2011

Decades	Growth Rate
1951-1961	4.5
1961-1974	31.1
1974-1981	16.9
1981-1991	17.3
1991-2001	11.0
2001-2011	25.0

3.1.6 Literacy and Education: Information on Literacy and Education is furnished below:

- **Literacy:** In Balaganj upazila it is found that 50.2% population aged 7 years and over are literate. Literacy rates by sex of three consecutive censuses are shown below:

Table 1.2: Literacy rate by sex, 1991-2011

Item	1991	2001	2011
Both Sex	31.4	47.8	50.2
Male	35.9	50.0	51.2
Female	26.7	45.2	49.3

Literacy rate is also shown in a Bar-Diagram below:

Figure 1.2: Literacy rate by sex, 1991-2011

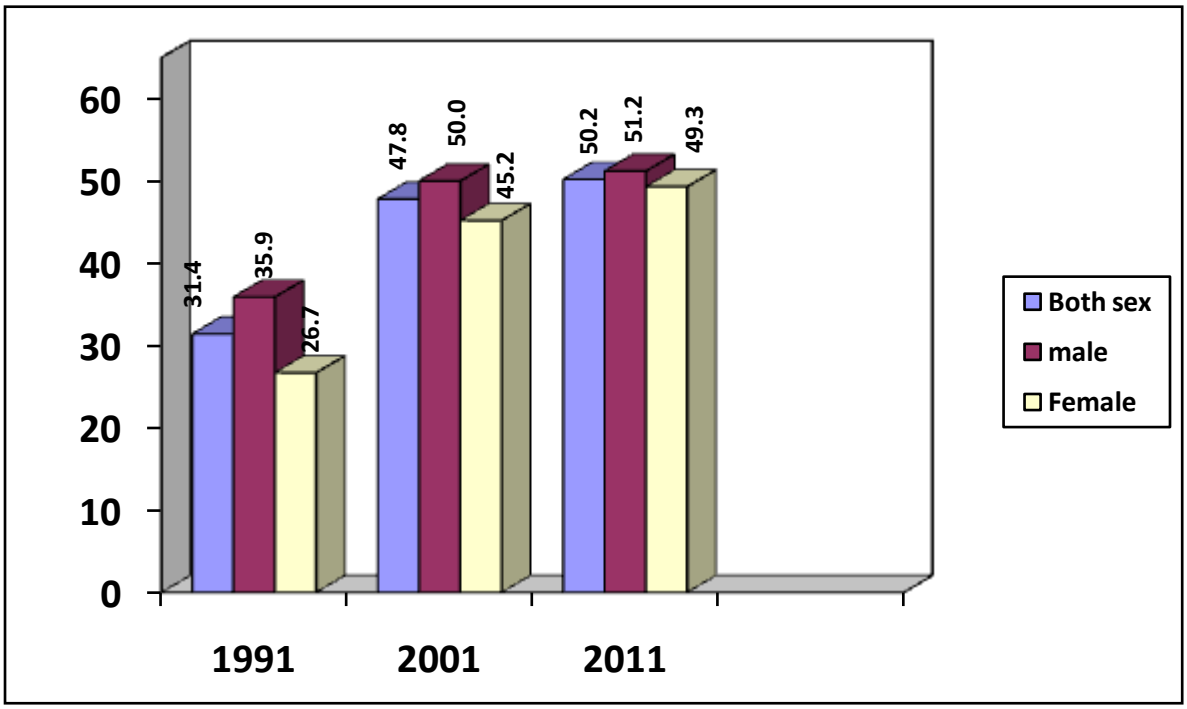


Table 1.2 shows that, the literacy rate of the Balaganj upazila in 2011 is 50.2% for both sex, 51.2% for male and 49.3% for female. The table shows an increase of 2.4, 1.2 and 4.1 percent point in 2011 over 2001 for both sex, male and female respectively. In the upazila the literacy is the highest i.e. 59.1% in Balaganj union and the lowest i.e. 34.4% in Purbapailanpur union.

- **Education:** School attendance of boys and girls between age 3-29 years is presented below:

Table 1.3: School attendance rate by sex- 2011

Item	3-5 years	6-10 years	11-14 years	15-19 years	20-24 years	25-29 years
Both Sex	11.83	81.99	73.94	31.27	5.36	0.70
Male	11.03	80.75	71.56	31.80	7.49	1.16
Female	12.64	83.29	76.33	30.76	3.33	0.30

There exist sex differentials in school attendance rates in various age groups which can be observed from the Table 1.3. The female attendance rate in the age group 3-5, 6-10 and 11-14 is comparatively higher than their male counterpart. On the other hand, male attendance rate in the age group 15-19, 20-24 and 25-29 is higher than female.

3.2.1 Background: Beanibazar, the 3rd smallest upazila of Sylhet zila in respect of area, came into existence on 5 October, 1938 as a thana and was upgraded to upazila in 1984. Nothing is definitely known about the origin of the upazila name. It is learnt that in the past this area was a dense forest the full of ferocious animals and snakes. They used to come out of the forest in the evening for prey. With a view to avoiding any danger of these ferocious animals and snakes, the local people developed a morning trading center (Bihan bazar) in the area. It is generally believed that the upazila might have originated its name from these two words ***Bihan*** and ***Bazar***.

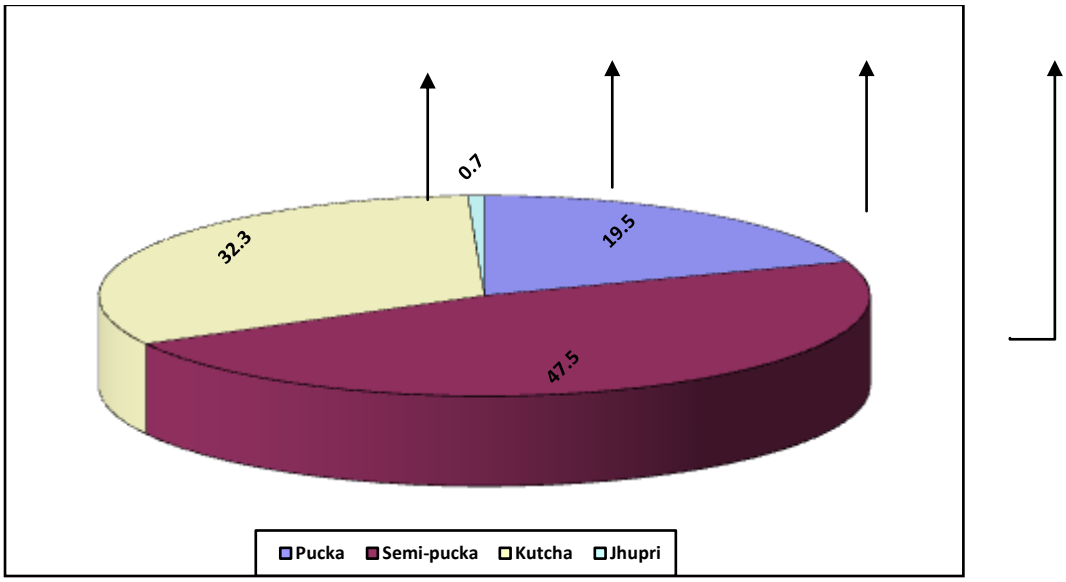
3.2.2 Area and Location: The upazila occupies area of 253.24 sq. km. It is located between 24º45´ and 24º57ó north latitudes and between 92º03´ and 92º15´ east longitudes. The upazila is bounded on the north by Kanighat upazila, on the east by Zakiganj upazila, India and Baralekha upazila of Maulvibazar zila, on the South by Baralekha upazila of Maulvibazar zila and on the west by Golapganj upazila.

3.2.3 Union-Ward, Mauza-Mahalla and Village Characteristics: The upazila consists of 1 paurashava, 9 wards 37 mahallas 10 unions, 134populated mauzas and 174 villages. The average population of each ward and mahalla are 4670 and 1136 respectively. On the other hand, the average of size of each union, mauza and village are 21159, 1579 and 1216 respectively.

3.2.4 Housing and Household Characteristics: In the upazila, there are 42119 households. Distribution of households by type shows that, 99.22% general units, 0.09% institutional and 0.69% other units.

- **Household Size:** The average household size (General) for the upazila is 6.0 persons, for rural area the size is also 6.1 and for urban area the size is slightly lower i.e., 5.4 persons.
- **Type of Housing Structure:** In the upazila 19.5% general households live in pucca houses, 47.5% in semi-pucca houses and 32.3% in kancha houses and the remaining 0.7% live in jhupri which is shown in a pie-chart below:

Figure 2.1: Housing structure by type, 2011



- **Source of Drinking Water:** In Beanibazar upazila, 82.1% of general households get the facility of drinking water from tube-well, 8.6% from tap and the remaining 9.2% households get water from other sources.
- **Sanitation:** In the upazila, 76.5% of general households have sanitary latrines, 22.7.0% non-sanitary latrines and 0.8% has no toilet facility.

- **Access to Electricity:** All the 10 unions of the upazila have brought under the Rural Electrification Program. However, a total of 71.9% of the general households reported to have electricity connection in the entire upazila.

3.2.5 Population Characteristics: According to Population and Housing Census 2011, the total population of the upazila is 253616, of which 123939 are males and 129677 are females. The sex ratio of the upazila is 96 males per 100 females in 2011 as against 99 males per 100 females in 2001.

- ❖ **Growth Rate:** The decadal population growth rate for the upazila is 20.38 and annual compound growth rate is 1.84. The decadal growth rates over the last half-century are shown below:

Table 2.1: Decadal growth rate of population, 1951-2011

Decades	Growth Rate

3.11.1 Background: Sylhet Sadar, largest upazila of Sylhet zila in respect of population came into existence in 1867 as a thanaand was upgraded to upazila in 1984. Nothing is definitely known about the origin of the upazila name. It is learnt that in the remote past there grew a weekly hat (market) for trading Syl (grinding stone) . It is belived that the upazila might have derived its name from these two words ***Syl*** and ***hat.*** Sylhet is now the Divisional Headquarters of Sylhet division. All divisional offices are located here. In addition to these offices, many educational institutions like Shah Jalal University, Osmani Medical College & Hospital and Sylhet Cadet College were established here very rapidly according to the need of the people. Osmani International Airport, many Tea gardens and Radio/TV station are located here. Above all, Sylhet is mainly prominent for the mazar of the great saint **Hazrat Shah Jalal (Rah**) and **Hazrat Shah Paran (Rah)** who migrated in this area from Yeamen to preach Islam.

3.11.2 Area and Location: The upazila occupies an area of 301.80 sq. km. including 5.84 sq. km. river areas and 8.10 sq. km. forest area. It is located between 24°43´ and 24°77´ north latitude and between 91°40´ and 91°01´ east longitudes. The upazila is bounded on the north by Companyganj and Gowainghat upazilas, on the east by Golapganj and Jaintiapur upazilas, on the south by Dakshin Surma upazila and on the west by Chhatak upazila of Sunamganj zila and Bishwanath upazila.

3.11.3 Union-Ward, Mauza-Mahalla and Village Characteristics: The upazila consists of 1 city corporation 27 wards, 207 mahallas, 9 unions, 88populated mauzas and 353 villages. The average population of each ward and mahalla are 17968 and 2344 respectively. On the other hand, the average of size of each union, mauza and village are 33632, 3440 and 857 respectively.
