Message

I am glad to learn that the publication of community reports for each Zila is undertaken by the Bangladesh Bureau of Statistics (BBS) on the basis of census results to meet the demand of community level information by the users working at the grass root level. Kishoreganj Zila Community Report is one of the 64 Zila Community Reports to be published by the BBS.

The census results for each administrative units of the zila are furnished in the Zila Community Report of Kishoreganj in order to facilitate the users at various levels. I believe the data presented in the report will provide quality benchmark database to policy makers, planners, researchers, administrators, development partners and other agencies for formulating and implementing their plans and programs for overall development of the country. I also believe that this report will be helpful for all users both home and abroad.

The dedicated efforts of personnel employed in census have tremendously helped for the success of census operation. Moreover, the participation of people at large also play a vital role in this process. I deeply acknowledge the active participation and commendable cooperation of general public, government and non-government organizations, district and field administration, different local government bodies, print and electronic media for making the census possible. I also express my thanks to the European Union, US Census Bureau, U.S. Agency for International Development and United Nations Population Fund for their financial and technical support for completing this huge task.

I would like to express my sincere thanks to Secretary, Statistics and Informatics Division (SID) for her whole-hearted guidance and direction to execute and expedite this census modus operandi and its publications. Finally, I appreciate the contribution of Director General, BBS and all other officials of SID and BBS involved in this effort for bringing out this report.

Message

I am happy to know that the Community Report of Kishoreganj Zila is going to be published by Bangladesh Bureau of Statistics (BBS) on the basis of the result of Population and Housing Census 2011 to meet the requirements of data users at the national and sub-national levels. This report is one of the 64 Zila Community Reports of the country.

I believe that the data presented in the report will provide quality benchmark database to public representatives, policy makers, planners, researchers, administrators, development partners and other government and non-government agencies for formulating and implementing plans and programs. This will also help in prioritization of resource allocation according to population density and other socio-economic characteristics of the population.

I express my heartfelt thanks to the Secretary, Statistics and Informatics Division (SID) for her effective guidance and significant role in implementing the census operation and other procedures. Finally, I would like to thank the Director General, BBS and officials of SID and BBS who actively helped in implementing the census activities, processing of census data and preparation of this report and finally bringing it out.

Foreword

Population Census is indeed the only recognized and reliable data source in Bangladesh on size, spatial distribution and all basic characteristics of population from national level down to village level. Bangladesh Bureau of Statistics (BBS) had conducted the fifth Population and Housing Census 2011 during the period of March 15-19, 2011 starting at the zero hour of 15 March, 2011. The publication of community reports for each zila is undertaken on the basis of census results to meet the demand of community level data and information for local level planning and policy making. Kishoreganj Zila Community Report is one of the 64 Community Reports of the country.

The census results for each upazila by union, ward, mahalla, mauza and village are furnished in the community report of Kishoreganj Zila in order to facilitate the users at various levels. Two sections of the report namely, "At a Glance" and an "Analytical Findings" will be of special advantage to the users. I believe that the data presented in this report will provide a benchmark database to policy makers, planners, researchers, administrators, development partners and other agencies for formulating and implementing their plans and programs for overall development. I also believe that this report will be helpful for all users both at home and abroad.

I deeply acknowledge the active participation and commendable cooperation of all the government and non-government organizations, district and field administration, different local government bodies, print and electronic media of the country for making the Census possible. I also express my gratitude to the European Union (EU), US Census Bureau, U.S. Agency for International Development (USAID) and United Nations Population Fund (UNFPA) for their financial and technical assistance for completing this colossal task. I express my heartfelt gratitude to AHM Mustafa Kamal, FCA, MP, Honorable Minister, Ministry of Planning for his effective guidance and significant cooperation throughout the Census operation. We are also grateful to the respected Cabinet Secretary and the Senior Secretary, Ministry of Public Administration for their active cooperation.

The Population and Housing Census 2011 had made best use of the modern IT technology. In order to minimize time and manpower, modern technology like ICR (Intelligent Character Recognition) machines and iCADE (Integrated Computer Assisted Data Entry) system were used in capturing the census data. CSPro software was used in analyzing and processing of data. It may be mentioned that the census preliminary report has been published within 4 months of data collection and census data for the whole country up to mauza/village level and disseminated through BBS website within 15 months after the enumeration. I express my thanks to Director General and Deputy Director General, BBS, Project Director, Population and Housing Census 2011, members of the Editors' Forum, Project Directors' Forum and all other officers and staff members of BBS and report writing consultants involved in the efforts and finally bringing out this report in time.

Preface

Bangladesh has a long tradition of conducting the population census on decennial basis since 1872. The fifth population census of Bangladesh and fifteenth in the region, following the decennial periodicity, was conducted during March 15-19, 2011. The main objective of the census was to collect information on the basic characteristics related to housing, households and population for developing a comprehensive database for all development planning and human resource development programmes as well as economic management.

Population and Housing Census 2011 was conducted in three phases. In the First Phase, basic data about all households and individual members of the households were collected through ICR formatted questionnaire during March 15-19, 2011. In the Second Phase, quality and coverage of the main count were verified through a Post Enumeration Check (PEC) survey during April 10-14, 2011. For the first time in the census history of Bangladesh, PEC was conducted by an independent organization, namely Bangladesh Institute of Development Studies (BIDS). In the Third Phase, detailed socio-economic information was collected by administering a long machine readable questionnaire in a sample survey held during October 15-25, 2011.

The preparatory works of the census was started by Bangladesh Bureau of Statistics from mid 2009 with updating maps and area Geo-codes. The preliminary checking on the census questionnaire was done in several times through field operation. The census questionnaire was pre-tested in selected areas with the participation of some experts of the "Technical Committee". The views of the users' and experts' were taken into consideration for finalizing the questionnaire. The census field operation and quality of census inputs were tested under two zonal operations. Accordingly the questionnaire was designed in machine readable format with the technical assistance of US Census Bureau and was printed with the financial assistance of European Union (EU) through the United Nations Population Fund (UNFPA).

The entire country was divided into 2,96,718 Enumeration Areas (EAs) with the help of enumeration area maps in order to ensure full coverage, effective management and close supervision. There was a supervisor for every 6 or 7 enumerators to supervise their works. The Geo-coding system developed in the previous Census was checked, edited and computerized.

Modified Defacto Method was adopted in enumerating the population. Zero hour at the night of 15 March, 2011 was considered as the census moment. On the other hand, the hours between census moment and the following morning (6.00 a.m.) was considered as the census night. Basically the floating people were counted at that night for avoiding omission and duplication.

Census committees were formed at Zila, Upazila, Paurashava, Union/Ward levels to ensure participation of local administration and local bodies. Moreover, supervisors and enumerators were appointed from amongst the local unemployed youths and teachers.

At national level, a standing technical committee comprising of well-known census experts and users of census data was formed to provide technical support to BBS in planning, designing and executing the census. A seminar-cum-expert consultation was held at BBS with the census data users, experts, researches and educationist to get their views for finalizing the census questionnaire and other policy related issues.

A nationwide publicity campaign was carried out before census through posters, banners, leaflets, brochures, features, films, miking, radio, television and newspapers for the purpose of creating public awareness and motivation.

I express my heartfelt gratitude to the Honorable Minister for Planning for his effective guidance and significant cooperation in making the census a success. I express my deepest gratitude to Secretary, Statistics and Informatics Division (SID) for his whole-hearted support and cooperation to the census. Moreover, members of 'Steering Committee', 'Standing Technical Committee', Consultants and also to participants of the Seminar-cum-Expert Consultation for their valuable contributions for finalizing the questionnaire and the census programme. I am thankful to all members of the sub-committees on publicity, sampling and report writing for their valuable contribution. I am also thankful to our mass media, local bodies and the people at all level for their whole-hearted supports to the census.

Finally, I like to thank Deputy Director General, BBS, Project Director, Population and Housing Census 2011 Project, members of the 'Editors' Forum', 'Project Directors' Forum' and other officers and staff members of BBS and local consultants who vigorously helped in implementing the census activities and processing the census data with their relentless efforts to make the census a success and bringing out this report within a very shortest possible time.

Physical Features of Kishoreganj Zila

Background: Kishioreganj emerged as a sub-division of former Mymensingh District in 1860. It was turned into a zila in 1984. Nothing is definitely known about the origin of the name of the zila. It is said that there was an influential Zamindar named Krishan Das Bashak in this region. The name of one of his sons was **Nanda Kishore** who set up a trading centre (meaning Ganj in Bangla) in the present zila headquarters. It is believed that the zila name has been derived from the words **Kishore** and **Ganj**.

Area and Location: The zila is bounded on the north by Netrokona Zila on the east by Sunamganj Zila, Habiganj Zila and Brahmanbaria Zila, on the south by Narsingdi Zila and Brahmanbaria Zila and on the west by Mymensingh Zila and Gazipur Zila. It lies between 24°02′ and 24°39′ north latitudes and between 90°15′ and 91°15′ east longitudes. The total area of the zila is 2688.59 sq. km. (1038.00 sq. miles).

Administration: The zila consists of 13 upazilas, 108 unions, 883 mauzas, 1725 villages, 8 paurashavas, 75 wards and 228 mahallas. The upazilas are Austagram, Bajitpur, Bhairab, Hossainpur, Itna, Karimganj, Katiadi, Kishoreganj Sadar, Kuliarchar, Mithamain, Nikli, Pakundia and Tarail.

Township: Kishoreganj City consists of Kishoreganj Paurashava with 9 wards and 56 mahallas. The total area of the city is 11.30 sq. km. The whole city area is under paurashava. Kishoreganj Municipality was established in 1869. It was renamed Kishoreganj Paurashava in 1972.

Archaeological Heritage and Relics: Among the archaeological heritages, Jangalbari Fort (fifteenth century), Egarasindhur Fort (fifteenth century), Sadi Mosque (1652), Salanka Jame Mosque at Pakundia, Gurai Mosque at Bajitpur (1680), Kutub Shah Mosque at Austagram (1538), Jawar Saheb Bari Mosque at Tarail (1534), Badshahi Mosque at Itna (seventeenth century), Bhagalpur Dewan Bari Mosque at Bajitpur (eighteenth century), Sekandarnagar Mosque at Tarail (eighteenth century), Hazrat Samsuddin Bokhari Mosque Kurikhai at Katiadi (1005), Chandrabati Shiva Mondir (sixteenth century), Delhi Akhra at Mithamain, Arabic stone inscription discovered at village Ghagra, Nataraj Shiva Sculpture discovered at Nikli (fourteenth century), Krishnadas' deed for Nandakishore Pramanik discovered at Kishoreganj Sadar (1759) are the notable.

Historical Events: In the ancient time Kishoreganj area was included in the kingdom of the Kamrupa. In the 11th and 12th century the Pala, Varman and Sena kings ruled this area or part of it. After that there arose petty independent kingdoms under the Koch, Hajong, Garo and Rajbanshi. Although in 1491 AD the greater part of Mymensingh was included within the Muslim rule under Firoz Shah, Kishoreganj remained outside. Greater part of Kishoreganj was included in the Mughal Empire during the rein of the Mughal Emperor Akbar. But some areas including Jangalbari and Egarasindhur remained under the Koch and Ahom kings. In 1538 AD the Ahom king of Egarasindhur was defeated by the Mughals and in 1580 the Koch Chief of Jangalbari was defeated by Isa Khan. The episode of the conflict between the Mughal Commander Man Singh and Isa Khan, the Chief of the Bara Bhuiyans in 1580 and the defeat of Man Singh at Egarasindhur are still current. Though after the death of Isa Khan in 1599 the grater part of Kishoreganj was still under the rule of his son Musa Khan who ultimately seceded to the Mughals.

Marks of the War of Liberation: There are 2 mass graves-Shararchar railgate (Bajitpur), Barai (Iitna); 4 memorial monuments-Pirijpur (Bajitpur), Halgara Kheyaghat (Bhairab), Sahid Manjur gate (Hossainpur), Gurudayal College Campus (Kishoreganj Sadar); 1 memorial Sculpture-Durjoy Bhairab (Bhairab bus stand); 6 much killing sites- kurighat (Hosenpur), Baraitala of Jasodal Sugar Mills and Siddheswary Ferry ghat (Kishoreganj Sadar), Baira (Mithamain), behind the Shashanghat (Nikli bazar) which bear the testimony of the War of Liberation in Kishoreganj Zila.

Temperature, Rainfall and Soil: The annual average temperature of the zila varies maximum 33.3°C to minimum 12°C and the average annual rainfall of the zila is 2174 mm. The soil formation of the zila is alluvial sand coming from Brahmaputra, Meghna and other small rivers. The soil is fertile.

Rivers: The principal rivers of the zila are Old Brahmaputra, Meghna, Kalni, Dhanu, Ghorautra, Baurii, Narasunda and Piyain.

Crops: The major agricultural crops of Kishoreganj Zila are paddy, jute, sugarcane, wheat, turmeric, oil seed, onion, garlic, potato, betel leaf and huge varieties of vagitables.

Fruits: The common fruits found in this zila are mango, jackfruit, banana, lichi, black berry, coconut, palm and papaya.

Transport: Palanquin, horse carriage, bullock cart and country boat were the traditional transports in the rural areas of Kishoreganj Zila. These means of transports are either extinct or nearly extinct except of country boat. Now-a-days, all the upazilas except Austagram, Itna and Mithamain are connected to the zila headquarters by metalled roads. Bus, minibus, three wheelers ply over the zila.

CHAPTER - 1

Introductory Notes on Census

1.1 Introduction: The population and housing census is the unique source of reliable and comprehensive data about the size of population and also on major socio-economic & socio-demographic characteristics of the country.

The population and housing census provides information on geographic and administrative distribution of population and household in addition to the demographic and socio-economic characteristics of all the people in the country. The data from the census are classified, tabulated and disseminated so that researchers, administrators, policy makers and development partners can use census data in formulating and implementing various multi-sectorial development programs at the national and community levels.

The purpose of community report is to disseminate census data by communities (ward/mahalla in urban areas and union/mauza/village in rural areas). Data on all key variables namely area, household, population by sex and age group, ethnic population, literacy rate, marital status, school attendance , employment status and religion as well as physical facilities such as source of drinking water, sanitation, electricity and dwelling units have been presented in this report. The users will find this report as a valuable reference document for formulating plans and programmes for welfare and well-being of the common people, in particular for the community in general.

1.2 Census and its Periodicity: Bangladesh Bureau of Statistics is the national statistical organization for conducting national census. In 1872, the practice of census was started in this territory. Thereafter, another census was conducted in 1881 and since then the decennial periodicity of census was maintained with the exception of 1971 which was held up and delayed till the year 1974 because of the Liberation War. The 1974 census was the first census in Bangladesh after her emergence as an independent country in 1971.Bangladesh went back to the decennial periodicity and conducted the second, third, and fourth censuses in 1981, 1991 and 2001 respectively. The Population and housing census of 2011 is the 5th in this census series.

1.3 Objectives: The population census was carried out to achieve the following objectives:

- To conduct the 5th national population and housing census of Bangladesh through count of 100% households and population on specific date of 2011.
- To develop database or benchmark data for local level planning up to village and union level.
- To prepare sampling frame for all censuses and surveys.
- To prepare data for electoral roll of national and local elections;
- To prepare data for fixation of quota and proportionate distribution of resources.
- To prepare data for implementation of development works at the local levels.
- To prepare database for micro-credit and productive employment at the local level.
- To generate data for ensuring education for all through participatory approach.
- To prepare database for assurance of health and nutrition for all through social mobilization.
- To make population projection at the regional level.
- To generate data for preparation of monographs and monitoring the progress of MDGs such as, alleviation of poverty through accelerated economic growth, generation of productive employment, human resource development, compulsory primary education and assurance of health and nutrition for all by 2015.

1.4 Census Phases: The census data collection was completed in three phases.

Phase I - Main Count: Collection of basic information for all households and individuals using an ICR formatted questionnaire.

Phase II- Post Enumeration Check (PEC): A PEC survey was carried out to measure quality and coverage of the main census count. The survey was conducted immediately after receiving filled-in census questionnaires at Dhaka head office. For the first time in census history of Bangladesh, the

PEC was conducted by an independent organization, namely Bangladesh Institute of Development Studies (BIDS).

Phase III- Sample Census: A sample census (large scale sample survey) was carried out at the last phase. For this undertaking, ICR formatted long questionnaire was adopted to supplement the data of the main census. Being a programme of much wider information coverage, the sample census was carried out with the detailed data relating to population and household characteristics including fertility, mortality, morbidity, migration etc.

1.5 Census Planning: The census preparatory work programme was mounted in the mid of 2009. A census work-plan was prepared defining in details the activities to be performed and completed by specific dates in each calendar year. Field instruction manual and training manual were prepared for census workers of different stages. These manuals provided precise guidelines regarding: (i) duties and responsibilities to be performed at all levels, (ii) lessons to be shared during training of field supervisors and enumerators, (iii) mapping and geo-coding operation, (iv) how questionnaire to be filled-up, (v) enumeration and supervision disciplines to be adhered, (vi) assignment of census workers, (vii) distribution of census materials, (viii) formation of census committees at different levels, and (ix) implementation of publicity activities as per plan.

1.6 Mapping: The updated and well defined map is one of the basic instruments to succeed any population and housing census. The primary objectives of the mapping operation are (i) to update the produced GIS maps and delineate enumeration areas (EA) in the country to facilitate the smooth counting of inhabitants during enumeration and (ii) fundamentally to ascertain that all areas are covered and that everyone in the country is counted with minimal possibility of under or over counting.

Household counting for EA demarcation and concurrent EA mapping activities were carried out in two phases beginning from May, 2009. The first phase, confined exclusively to rural areas, necessitated updating and preparing of union, mauza, and control maps. The second phase was initiated only for urban coverage in view of the complex task associated with household and EA boundary identifications due to quite dense habitations in urban localities. All urban ward, mahalla, and control maps were updated and/or newly prepared showing current boundaries. BBS used GIS Maps for field operation for the first time in census history of Bangladesh. GIS Maps Project of BBS produced the maps from aerial photography. The updated maps were used for zonal operations. All maps were finally checked and updated during zonal operations. The updated EA maps were used for main census, PEC and sample censuses.

1.7 Designing and Pre-testing of Questionnaire: The contents of census questionnaire were determined based on data needs assessed on government current priorities and also recommendations of technical committee and data users. Several preliminary checks of the questionnaire were made locally. Lastly, the questionnaire was pre-tested in selected areas with participation of some experts of the technical committee. Satisfactory pre-test results were resolved in finalising a two module questionnaire for adoption in the census. Accordingly the questionnaire was designed in machine readable format with the technical assistance from US Census Bureau and was printed with the financial assistance from European Union (EU) through United Nations Population Fund (UNFPA).

1.8 Questionnaire: A two module questionnaires was used for the main census. As many as 25 questions were included in it. A total of 11 questions relating to housing and household characteristics were included in household module. The remaining 14 questions focusing on individuals were incorporated in individual module. The items of the questionnaire were identification, address of household, number and structure of house including tenancy, toilet facility, electricity connection, ethnicity, individual age, sex, religion, marital status, literacy, disability, education and working status. All data on the items were collected through door to door visit and interviewing head of the household or responsible member in absence of head of the household.

1.9 Zonal Operation: Two zonal operations were executed in both urban and rural areas. These operations helped in setting up a system germane to: (i) involve local people in the census, (ii) interact with local bodies, and (iii) ensure efficient field work arrangements.

The first zonal operation was held during May-July 2010 in 3 (three) phases. In the first phase, it covered 39 zilas, second phase 17 zilas and third phase 8 zilas. During first zonal operation the following tasks were completed:

a) Updated of geo-code list;
b) Updated of Mauza and Mahalla maps with demarcation of EA boundaries;
c) Prepared the supervisors' sketch maps;
d) Prepared the primary list of local enumerators and supervisors with names and addresses and
e) Identified the depopulated Mauzas and Mahallas.

Besides, Zonal Officers introduced themselves to the public representatives of different local bodies and local administration and sought their support and cooperation in completing census activities successfully. They extended all sorts of cooperation and gave their best effort for the completion of field activities of census in Kishoreganj.

The second zonal operation was mounted just three months prior to census, i.e. November-December 2010, to conduct the main census in March, 2011. This schedule ensured the smooth flow of census activities including field management system.

The main tasks completed in second zonal operation:

a) Formed census committees in zilas, upazilas/thanas, wards/unions, paurashavas and city corporations,
b) Interacted with local bodies,
c) Verified supervisor maps and getting those finalised,
d) Finalized the lists of supervisors and enumerators and
e) Checked and endorsing locations and available facilities of training centres selected to train enumerators and supervisors. All these activities were performed by 2,612 Zonal officers under the supervision of 130 Census zila coordinators who were engaged from BBS and other ministries.

The terrains and habitation patterns of the localities were taken into consideration in forming EAs. mauza/ward maps were used for exact identifications of EAs within mauzas and wards. During census enumeration final base maps and supervisor maps were used by the Zonal Officers, Enumerators and Supervisors for field control and overcoming coverage errors.

1.10 Organization: The lowest unit of census was Enumeration Area (EA). As many as 2,96,718 EAs were delineated all over the country where Kishoreganj had the total number of 6225 EAs. Above them there were 48,531 Supervisors' Areas (SAs) throughout the country where Kishoreganj had 935 Supervisors' Areas with every SA having 6-7 EAs. For each EA one enumerator and for each SA one supervisor were appointed temporarily from local educated youths. Females were given priority in selecting enumerators and supervisors. Enumerators and supervisors were controlled by 2,612 Zonal Officers where at Kishoreganj there were 57 Zones. To supervise the activities of zonal officers, 130 Census zila coordinators deployed from Class-I officers of BBS, SID and Ministry of Public Administration. For census operation Kishoreganj Zila was divided into three Census zila, each census zila was supervised by one Census zila coordinator. Each zone was consisted of taking about 100 enumeration areas. The large mauzas/villages were divided into two or more enumeration areas and small mauzas/villages were merged to form an enumeration area consisting of about 120 households, keeping in view the terrain and habitation pattern of the locality. The Project Director of Population and Housing Census Project was the coordinator of field activities and maintained liaison with higher authority and different organizations. The Director General of Bangladesh Bureau of Statistics acted as the Census Commissioner and the National Census Coordinator. The Secretary of

Statistics and Informatics Division was the Chief Census Coordinator who guided the whole system of census programme and implementation.

The local administration and public representatives participated in the census through census committees formed for City Corporations, Paurashavas, Zilas, Upazilas, Wards, and Union Parisads. The Mayors of City Corporations and Paurashavas, Deputy Commissioners, Upazila Chairman, Ward Councillor and Chairman of Union Parishads headed the respective census committees with BBS officials being the Member-Secretaries.

Central census control room was established at Dhaka headquarter of BBS (Parishankhyan Bhaban) under active supervision of the Project Director. Similarly, control rooms were established in each administrative levels namely zila, Upazila and Union. These control rooms functioned round the clock during entire field enumeration period. A number of officials were engaged to provide logistics during census field activities, monitored constantly the census performance, informed the National Coordinator and Chief Census Co-ordinator about performance status and obtained their instructions for successful completion of the census.

1.11 Enumeration: The population across the country was counted at a stretch for five days during 15-19 March 2011 using machine readable questionnaires. The counting began at zero hour of 15 March 2011. Floating people were counted from zero-hour till 6.00 am (the night is called census night) at the places where they were found passing the night. In case of households, on the other hand, all members were enumerated in their residences. The modified de-facto method was followed in counting, i.e. every person was counted at the place where he/she stayed in the census night except the people on board and on duty, counted at their residence.

1.12 Data Capturing/Processing: The adoption of Intelligence Character Recognition (ICR) strategy was planned for census data capturing. As such, ICR machines were procured. BBS had gathered experience in OMR and OCR techniques of data capturing from earlier censuses of 1981, 1991 and 2001. The ICR technology was introduced in this census. US Census Bureau supported BBS in using Capture Pro and iCADE (Integrated Computer Assisted Data Entry) system for data capturing. For analyzing and tabulating census data CSPro software was used.

iCADE: Integrated Computer Assisted Data Entry provides digital images of respondent questionnaires. Data were processed through OMR, OCR, KFI, Quality Assurance (QA). Automated tracking system was present at each step in the process.

Steps:

i) **Batching and Batch Identification:** Filled-in census questionnaires were batched for processing. An identifying batch cover sheet was created. Batch status numbers were kept in the database along with other relevant metadata.

ii) **Scanning:** Each page from the batched census questionnaires was scanned into a TIFF Image. In each step status info is kept in the database.

iii) **Auto-registration:** Auto-registration relates images to the Master Template, registration of barcodes of forms, and reading checkboxes. This may be treated as preliminary “mini” OCR process. Auto-registration then creates a script with data, captured so far.

iv) **Manual Registration:** Images where auto-registration detected positional tolerance errors are sent to a clerk who resolves skewing and bar code issues and repairs checkbox ambiguities. The OMR clerk examines all checkboxes.

v) **Batch Completeness/Exception Review:** Batch completeness identifies batches with problems, forms with missing, loose or duplicate pages, batched not scanned, scanned not batched. In Exception Review, the clerk verifies each issue (checking paper forms if needed) and takes appropriate action.

vi) **OCR Review:** Converts designated handwritten and printed text fields to electronic data with more than 99% accuracy for numbers. A clerk then reviews OCR results, verifying all 1s, 2s, etc. Any rejected field has to be reprocessed using KFI.

vii) **Key From Image (KFI):** The OMR portion of the programme captures check box data prior to KFI. KFI technology guides a keying clerk to the write-in fields on the form where the system detects presence. Furthermore, a keyer does not take any field already read by the OCR machine. Keyers may also re-register skewed pages or correct checkbox answers.

viii) **Quality Assurance (QA):** Two samples are drawn, one from the OCR read "universe" and one from the KFI keyed-in "universe". They are sent to an independent keyer to be rekeyed. OCR and KFI may have different sampling rates and different accept/reject quality rates. These results are then verified against the data captured earlier, and discrepancies are presented and corrected by analysts.

ix) **Sample Verification, Classification and Adjudication:** A sample of the fields is keyed by an independent verifier. A classifier reviews images and data from OCR/KFI and compares with verifier's data. An adjudicator determines final truth and decides if the batch is acceptable, and determines the cause of discrepancies, which may be charged against the original keyer.

x) **Remainder Verifier, Classifier and Adjudicator:** If batch quality for either universe is unacceptable, all remaining fields are rekeyed by a verifier, and results are compared and corrected by a classifier, and adjudicated by a final adjudicator.

All records were subject to an efficient computer edit and imputation programme. The errors and inconsistencies, if detected, were imputed by applying both **hot-deck** and **cold-deck** methods.

1.13 Data Tabulation: Separate files were maintained for all zilas. The census tabulation plan was finalised through technical committees' recommendations admitted of options for comparing most of the individual cells with 2001 census results. The tabulation programme was developed in CSPro and thoroughly tested before adopting for census tabulation. All tables were transferred to MS Excel/MS Word format for ensuring correct headings and footnotes.

1.14 Publication: The census reports will provide population information at the national, zila and community levels. Besides the Community Reports, Zila Reports, National: Analytical Report, Socio-economic & Demographic Report, Urban Area Report, Union Statistics Report and Administrative Report will be published during the coming months.

1.15 Post Enumeration Check (PEC): To assess coverage of the census an effectively designed Post Enumeration Check (PEC) survey was conducted just a month after completing the census. Bangladesh Institute of Development Studies (BIDS) conducted the PEC survey. The PEC survey data were collected during 10-14 April 2011. The net under coverage rates were estimated separately for national level aggregate and also for rural, urban, other urban (Upazila Headquarters) and City Corporation areas which are given below:

Locality	Net error rate (%)
National	3.97
Rural	3.80
Urban	5.26
Other Urban (UHQ)	4.07
City Corporation	3.86

The PEC Survey Report can be obtained from Bangladesh Institute of Development Studies (BIDS) and also from the online addresses of Bangladesh Bureau of Statistics and BIDS respectively: *www.bbs.gov.bd* and *www.bids.org.bd*

CHAPTER - 2

Concepts and Definitions

The concepts and definitions adopted in the census and those presented in this report are as follows:

Census Moment: It is the precise time hour fixed for starting nation-wide census enumeration. In the census, the zero hour of 15 March 2011 was treated as the census moment.

Census Night: The time span from census moment of time zero hour to 6:00 a.m. of 15 March 2011 was the census night.

Census Period: It includes the days ascertained to complete the census enumeration activities. In this census, 15-19 March 2011 was considered as the census period.

Reference Period: It is reference time cut off to which particular sets of census date items relate. In this census two reference periods were used. These are:

i) Field of Economic Activity: One week preceding to census moment (8 to 14 March 2011)

ii) For other variables: Census night.

Modified De-facto Method: It means the system of enumerating people at places of their residence or where they spent the census night. Adhering to this method, the counting of floating population across the country was completed during census night at places they were found except the people on duty or on board. The remaining vast majority of the people were counted in their usual residence (including people on duty or on board) during 5 (five) days census period. As this is a slight deviation of de-facto method, so it is termed as modified de-facto.

Floating Population: People who were detected passing the census night at railway stations, launch ghats, bus terminals, boats, temples, pagodas, mosques, hotels (boarders), footpaths, under building-stairs, overpass/underpass and some other unusual places were considered as floating population. The people who were fishing at deep sea and hiving in the forest especially in the Sundarbans were also treated as floating population.

Household: Persons, either related or unrelated, living together and taking food from the same cooking pot constitute a household. A single person living and eating alone forms one-person household. Households which are classified into three categories are defined below:

i) **General (dwelling) Household:** Includes all households having usual dwelling places. In 2001 census it was used as dwelling household.

ii) **Institutional Household:** Hospitals, clinics, jails, barracks, orphanages, hostels/halls of educational institutions etc. were treated as Institutional Households.

iii) **Other Household:** Includes those households other than general and institutional found in census night such as messes, shops, offices etc.

Ownership and Tenancy of Dwelling Unit: Tenancy status of dwelling units were classified into the following three classes:

i) **Owned:** Dwelling unit found occupied and used by household owning it.

ii) **Rented:** Dwelling unit found occupied and used under arrangement of contractually rented.

iii) **Rent free:** Dwelling unit found occupied and used without rent.

Literacy: It denotes to the ability of writing a letter in any language. Literacy rate is calculated for population 7 years and over, 15 years and over and also for population of all ages.

Sex Ratio: It is the number of males per 100 females.

Community: It refers to the following geographic, administrative or revenue units:

i) **Zila:** Zila (Bengali word of District) is a mid-level administrative unit comprising of several upazilas/thanas and having Zila Parishad institution.

ii) **Upazila:** Upazila (Bengali word of Sub-district) is a rural administrative unit comprising of several unions and having Upazila Parishad institution.

iii) **Union:** Smallest administrative rural geographic unit comprising of mauzas and villages and having Union Parishad institution.

iv) **Mauza:** Lowest administrative unit having a separate jurisdiction list number (J.L No) in revenue records. Every mauza has its well-demarcated cadastral map. Mauza should be distinguished from local village since a mauza may consist of one or more villages.

v) **Village:** Lowest rural geographic unit either equivalent to a mauza or part of a mauza.

vi) **Ward:** Smallest administrative urban geographic unit comprising of mahallas and having ward council institution.

vii) **Mahalla:** Lowest urban geographic unit.

Urban Area: It corresponds with area developed around a central place having 5000 population with such amenities as metaled roads, improved communication, electricity, gas, water supply, sewerage, sanitation and also having comparatively higher density of population with majority population in non-agriculture occupations. City, Town, Paurasava and Cantonment are the examples of urban area.

i) **Mega City:** It is metropolitan area having population 5 millions or more.

ii) **City Corporation:** It includes city corporations/incorporated and administered by the Ministry of local government under City Corporation Act, 2009.

iii) **Paurashava/Municipality (PSA):** It includes paurashavas incorporated and administered by local government under Paurashava Act, 2009.

iv) **City:** It is an urban area having population 1,00,000 and above.

v) **Other Urban Area (OUA):** It includes those Upazila headquarters which are not paurashavas. The only exception relates to 17 unions adjacent to Dhaka City Corporation under Dhaka Metropolitan Area. These unions are treated as other urban areas on the basis of their urban characteristics.

vi) **Town:** It is an urban area having population less than 1,00,000.

Growth Rate: The annual population growth rate has been computed using the annual compounding formula:

$$P_n=P_0(1+r)^t$$

Where,

P_n = The population of 2011 census
P_0 = The population of 2001 census
r = Annual population growth rate
t = Time period between 2011 census to 2001 census

Note: 1. Mauza refers to populated mauzas in 2011.
2. General refers to general household in 2011 and dwelling household in 2001.
3. Dash (-) denotes data not available due to non-existence of paurashava.

3.1.1 Background: Austagram came into existence in 1905 as a thana and was upgraded to upazila in 1983. Nothing is definitely known about the origin of the upazila name. It is generally believed that the upazila might have been named Austagram after the name of the union where its headquarters is located. In the past, the union was created with eight villages. Eight means **Austa** and village means **Gram** in Bengali.

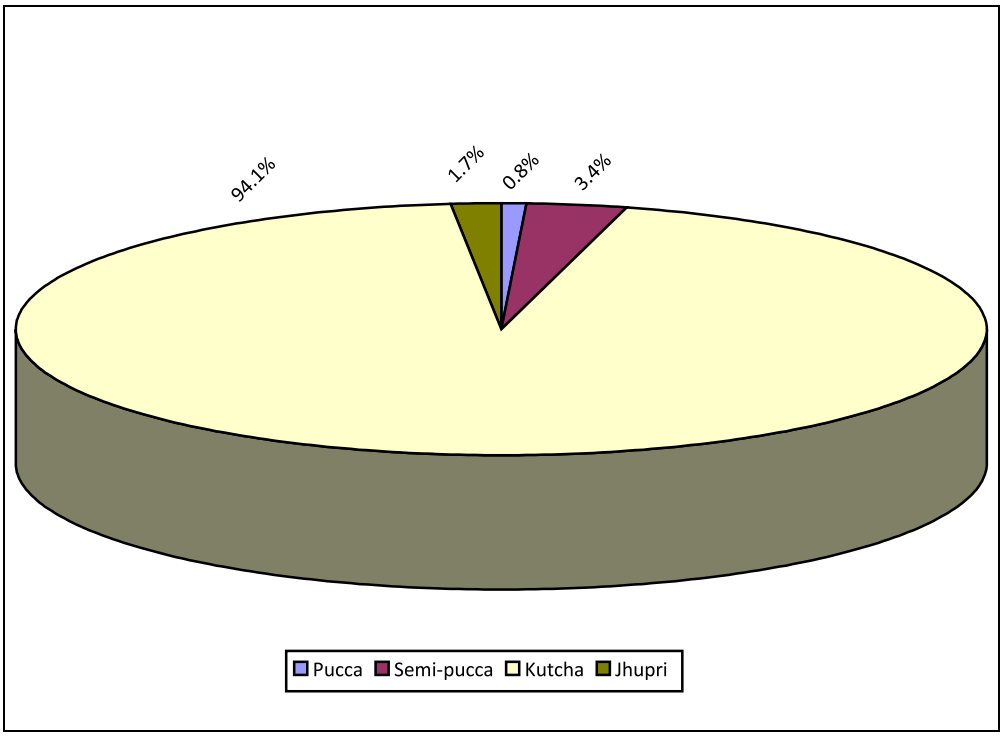
3.1.2 Area and Location: The upazila occupies an area of 355.53 sq. km. It is located between 24º13' and 24º27' north latitudes and between 90º59' and 90º15' east longitude. The upazila is bounded on the north by Mithamain Upazila, east by Lakhai Upazila and Baniachang Upazila of Habiganj Zila, south by Nasirnagar Upazila of Brahmanbari Zila and west by Nikli Upazila and Bajitpur Upazila.

3.1.3 Administrative/Geographic Unit: The upazila consists of 8 unions, 61 populated mauzas and 72 villages. The average of size of population each union, mauza and village are 19065, 2500 and 2118 respectively.

3.1.4 Housing and Household Characteristics: In the upazila, there are 31129 households. Distribution of household by type shows that there are 99.76% general unit, 0.01% institutional and 0.23% other unit.

- **Household Size:** The average household size (General) for the upazila is 4.9 persons, for rural area the size is slightly higher i.e. 5.0 and for urban area the size is somewhat lower i.e. 4.4.
- **Type of Housing Structure:** In the upazila, 0.8% general household live in pucca house, 3.4% in semi-pucca house, 94.1% in kutcha house and the remaining 1.7% live in jhupri which is shown in a pie-chart in figure 1.1.

Figure 1.1: Housing structure by type, 2011



- **Source of Drinking Water:** In Austagram Upazila, 92.8% general household get the facility of drinking water from tube-well, 0.1% from tap and the remaining 7.1% household get water from other sources.
- **Sanitation:** In the upazila, 37.1% general household use sanitary latrine, 54.4% non-sanitary latrine and the remaining 8.5% have no toilet facility.
- **Access to Electricity:** All the 8 unions of the upazila have brought under the Rural Electrification Program. However, a total of 43.7% general household reported to have electricity connection in the entire upazila in 2011 as against 12.6% in 2001.

3.1.5 Population Characteristics: According to Population and Housing Census 2011, the total population of the upazila is 152523 of which 75265 are males and 77258 are females. The sex ratio of the upazila is 97 which has remarkably decreased in 2011 as against 105 in 2001.

- **Growth Rate:** The decadal population growth rate for the upazila is 4.79% and the annual compound growth rate is 0.46%. The decadal growth rates over the last half-century are shown in table 1.1.

3.1.6 Literacy and Education: Information on literacy and education is furnished below:

- **Literacy:** In Austagram Upazila, it is found that 32.0% populations aged 7 years and over are literate in 2011 against 37.4% in 2001. This particular situation has happened due to the migration of a section of people from this upazila to other areas for better opportunities. Literacy rate by sex of three consecutive censuses are shown in table 1.2.

Table 1.2: Literacy rate by sex, 1991-2011

Item	1991	2001	2011
Both Sex	14.1	37.4	32.0
Male	18.4	42.5	34.0
Female	9.4	32.0	30.1

Literacy rate is also shown in a Bar-Diagram in figure 1.2.

Figure 1.2: Literacy rate by sex, 1991-2011

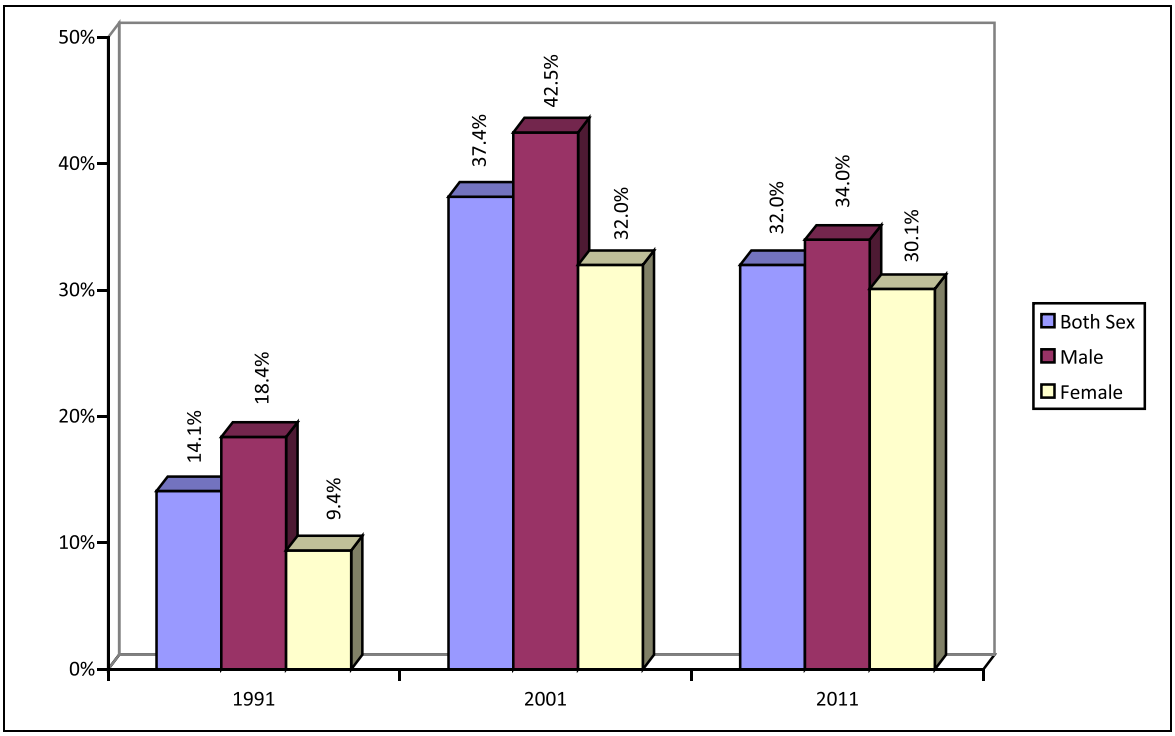

Table 1.2 shows that the literacy rate of the upazila in 2011 is 32.0% for both sex, 34.0% for male and 30.1% for female. It shows a decrease of 5.4, 8.5 and 1.9 percent point in 2011 over 2001 for both sex, male and female respectively. In the upazila, the literacy is the highest i.e. 37.3% in Purba Austagram Union and the lowest i.e. 26.1% in Kastail Union.

- **Education:** School attendance of boys and girls between age 3-29 years is presented in table1.3.

Table 1.3: School attendance rate by sex, 2011

Item	3-5 Years	6-10 Years	11-14 Years	15-19 Years	20-24 Years	25-29 Years
